My career is dedicated to advancing inclusive and democratic models of collaboration and fire governance that serve the land and people, resulting in fire-adapted communities and resilient landscapes. I accomplish this through a self-built program of qualitative research and Extension programming informed by needs and assets of practitioners, managers, and decision makers. My efforts are integrated through ongoing feedback loops where I directly assist collaborative efforts, and study emergent questions to create new knowledge and innovate practice. I also seek service opportunities that will amplify my impact and increase equity and inclusion in natural resource management and academia. I have raised \$4.17 million in grants and contracts, ranging from large competitive interdisciplinary grants to focused projects that serve community partners. I support employees and teams through a collaborative leadership approach focused on shared learning, individual coaching, and strategic direction.

Strengths (Clifton/Gallup): *Intellection—Achiever—Input—Ideation—Individualization*

EXTENSION PUBLICATIONS AND APPLIED RESEARCH REPORTS

These publications focus on sharing results and implications of applied research in formats accessible to managers, policy makers, and stakeholders of natural resources. They receive anonymous and non-anonymous peer review, depending on publication venue. The formats of these papers include:

- Oregon State University Extension Catalog publications: Science-based guidance on key management issues.
- Working paper, research contribution summary: Presentation of research results with a study rationale, methods, results, and implications for practice.
- Briefing paper: Summary of working paper that focuses on policy and management implications.
- Quick guide: An instructional resource with actionable advice on a particular topic.
- Fact sheet or case study brief: A summary of a case study example that offers lessons learned.

EXTENSION SPECIALIST ACTIVITIES

I serve those working in natural resource management partnerships and collaborative efforts, including the U.S. Forest Service, Oregon Department of Forestry, private landowners, watershed councils, and landscape coalitions. I also assist our own county Extension agents in identifying how they can serve collaborative efforts in their areas. I provide 1) direct one-on-one support to individual groups/units, 2) support to multiple groups/units on common issues, 3) lessons learned from individual efforts, 4) facilitation of peer learning among practitioners to share common challenges and strategies, and 5) boundary spanning between managers and science.
