

DAVID SHAW VITAE (2020)

David Carl Shaw
Professor (July 1, 2018)
Forestry and Natural Resources Extension, Forest Health Specialist
Director, Swiss Needle Cast Cooperative
Department of Forest Engineering, Resources and Management
Oregon State University

Fields of Specialization

Forest Health. Forest Pathology, Forest Entomology, Forest Ecology, Mistletoes, Insects/Diseases interaction with Fire, Silviculture and Management, Disturbance Ecology.

Education

1991. Ph.D. Forest Pathology, Protection and Silviculture. College of Forest Resources, University of Washington, Seattle.

1982. MS. Biology, Plant Ecology. Biology Department, Western Washington University, Bellingham.

1977. BS. Biology, extended major in Applied Plant Science. Biology Department, Northern Arizona University, Flagstaff, Arizona.

Employment

2005-Present. Oregon State University. Corvallis, Oregon, Professor (July 1, 2018), Forestry and Natural Resources Extension Forest Health Specialist, Director, Swiss Needle Cast Cooperative. Department of Forest Science (2005-2008), Dept. of Forest Engineering, Resources and Management (2008 – Present)

1994-2005. Wind River Experimental Forest, Wind River Canopy Crane Research Facility, University of Washington. Carson, Washington

1991-1994: Olympic Natural Resource Center, College of Forest Resources, University of Washington. Forks, Washington

1987-1990. Graduate Research Assistantships, University of Washington, Seattle.

1983-1989. Term Ecologist, Seasonal Field Botanist. US Forest Service, Area Ecology Program. Colville, Olympic, and Mt. Baker-Snoqualmie National Forests, Washington.

1983-1986. Soil Resource Specialist. Seasonal, spring and fall. Multnomah County Educational Service District, Outdoor School, Environmental Education, Portland, Oregon. Portland, Oregon.

Teaching

FOR 412/FOR512-Forest Entomology, Spring Quarter 2020. Forest Insects with a focus on major forest pests, beneficial insects, invasives, their biology, life cycle, importance and management.

FOR599- Field Forest Health, Fall Quarter, 6.5 field days, based in Corvallis. Pre-quarter field class designed to review forest types across Oregon, their major forest health issues, as well as defining and managing for forest health.

Non Credit Courses and Workshops (Extension). These programs focus on public presentations, field trips and workshops, tree school, continuing education conference organization, trainings, and workshops, and volunteer training for master woodland managers, master gardeners, and pest scene investigators.

Tree School. A FNR Extension one-day banquet of many different workshops, field tours and indoor classes.

Extension Conference Organization. Target Audience: professional foresters, forestry and other students, small industrial private landowners, agencies, forest management companies, members of research cooperatives, scientists, tribal foresters.

Trainings and Workshops for Continuing Professional Development. Target Audience: professional foresters, forestry and other students, small industrial private landowners, agencies, forest management companies, members of research cooperatives, scientists, and tribal foresters.

Volunteer Training. Two programs for volunteers to work with County FNR Extension Foresters: Master Woodland Manager, and Pest Scene Investigators. Sometimes assist with Master Gardeners with OSU Extension.

Graduate Students:

2018- present. Stephen Calkins MS. FERM
 2020. Adam Bouche, MS. FES. Co-advisor, major is K. Puettmann.
 2019. Andrew Russo MF. FERM
 2018. Sky (Yung-Hsiang) Lan, Ph.D. FES
 2016. Randi Shaw, MS. FES. Co-advised with Paul Anderson (USFS/FES).
 2016. Sean Prive, MS. FES.
 2016. Nicholas Willhelmi, MS. FERM
 2015. Kyle Pritchard, MS. FES, Co-advised with Joan Hagar, USGS, FES
 2015. Adam Burke, MS, FERM. Co-advised, Major Prof: S. Fitzgerald.
 2014. Dorian Alexanderson, MF. FERM
 2014. Ari DeMarco, MS, FERM
 2013. Michelle Agne, MS. FERM
 2011. Leif Mortensen, MS. FS

2008. Danny Norlander, MS, FS

Faculty Research Assistants, Current:

Gabriela Ritokova, Swiss Needle Cast Cooperative, Assistant Director
 Andy Bluhm, Permanent Sample Plot System, Vegetation Monitoring
 Matt Gregory, LEMMA

Programs

Swiss Needle Cast Cooperative

Swiss needle cast is foliage disease that is specific to Douglas-fir caused by the Ascomycete fungus *Nothophaeocryptopus gaeumannii*. The disease is causing an epidemic in coastal forest plantations, however, it was first described in Europe, but the fungus is native to western North America. The cooperative is a collaboration of industry, agencies, extension and academia which is focused on research, monitoring and outreach concerning impacts, epidemiology, spread and intensification of this disease.

Pacific Northwest Permanent Sample Plot System

Collaborating PNW Research Station, H.J. Andrews Experimental Forest, Long-term research network (LTER), and regional partners. We manage a permanent plot network to measure vegetation and tree dynamics across 145 installations in western Washington and NW Oregon, visited every 5-6 years. Some plots have been measured for over 100 years, and include USFS early plot installations. 45 installations occur on the HJA. Provides data for assessing long term forest health and mortality.
