

CURRICULUM VITAE

STEVEN M. WONDZELL

Research Riparian Ecologist
Corvallis Forestry Sciences Laboratory
Pacific Northwest Research Station
3200 SW Jefferson Way
Corvallis OR 97331

Tel: (541) 758-8753
FAX: (541) 750-7234
e-mail: steve.wondzell@usda.gov

EDUCATION:

Ph.D., Forest Ecology, 1994. Department of Forest Science, Oregon State University, Corvallis OR.
Thesis Title: *Flux of ground water and nitrogen through the floodplain of a fourth-order stream.*

M.S., Biology, 1984. Department of Biology, New Mexico State University, Las Cruces NM 88003.
Thesis Title: *Recovery of Desert Grasslands in Big Bend National Park Following 36 Years of Protection from Grazing of Domestic Livestock.*

B.S., Range Science, 1981. Department of Animal and Range Science, New Mexico State University, Las Cruces NM 88003.

EMPLOYMENT HISTORY:

Research Riparian Ecologist, Jan 2012 to present. Corvallis Forestry Sciences Laboratory, Pacific Northwest Research Station, USDA Forest Service, Corvallis, OR.

Research Riparian Ecologist, April 2000 to Dec 2011. Olympia Forestry Sciences Laboratory, Pacific Northwest Research Station, USDA Forest Service, Olympia WA.

Assistant Professor (Research), June 1996 to March 2000. Dept. Forest Science, Oregon State University, Corvallis OR.

Temporary Assistant Professor of Water Resources Management, Aug 1995 to May 1996. Dept. Natural Resources, University of New Hampshire, Durham NH.

NSF-NATO Post Doctoral Fellow, March 1994 to March 1995. Centre d'Écologie des Systèmes Fluviaux, 29 rue Jeanne Marvig, Toulouse, France.

JOURNAL and BOOK EDITORSHIPS

Associate Editor for Water Resources Research, a journal of the American Geophysical Union.
January 2013 to December 2014.

Guest-Editor for a Special issue of the journal Freshwater Science titled "Groundwater and Surface-Groundwater Interactions". Larned, S. (lead guest-editor) and four guest co-editors including Wondzell, S. M. (20 Manuscripts).

Guest-Editor for a Special issue of the journal Landscape and Urban Planning titled "Landscape Analysis: Projecting the effects of management and natural disturbances on forest and watershed resources of the Blue Mountains, Oregon, USA". Wondzell, S. M., Burnett, K. M., and Kline, J. D. (Guest Editors). Landscape and Urban Planning 80(3): 193-344. (13 Manuscripts).

PUBLICATIONS:

Manuscripts Submitted or in Preparation:

Hinshaw, S., E. Wohl, J. Burnett, and S. Wondzell. (*under revision after review by the Journal*). Monitoring Strategy for Stage 0 Restoration in the South Fork McKenzie River, Oregon. Submitted to Earth Surface Processes and Landforms.

Wondzell, S. M., and A. S. Ward. (*submitted*). The channel source hypothesis: empirical evidence for in-channel sourcing of solutes to explain hysteresis in a headwater mountain stream. Submitted to Hydrological Processes.

Invited Commentary:

Larned, S. T., Gooseff, M. N., Packman, A. I., Rugel, K., and Wondzell, S. M. 2015. (*Introduction to the Special Issue*) Groundwater—surface-water interactions: current research directions. Freshwater Science 34(1): 92-98.

Wondzell, S. M. 2015. Groundwater–surface-water interactions: perspectives on the development of the science over the last 20 years. Freshwater Science 34(1): 368-376.

Wondzell, S. M. 2010. Water and Sustainability: Reflections from the western United States. Northwest Science 84(3): 310-312.

Wondzell, S. M., Burnett, K. M., and Kline, J. D. 2007. (*Introduction to the Special Issue*) Landscape analysis: Projecting the effects of management and natural disturbances on forest and watershed resources of the Blue Mountains, OR, USA. Landscape and Urban Planning 80:193-197.

Peer-reviewed Manuscripts:

ELECTRONIC and AUDIOVISUAL OUTPUTS

Wondzell, S. M. 2000. Delineating the Extent of the Hyporheic Zone in Mountain Streams. Presentation #2. *in: A. Wald (editor) The Delineation of Hyporheic Zones in Western Alluvial Rivers – a videotaped seminar and panel discussion moderated by Susan Bolton, Center for Streamside Studies, University of Washington. Washington Department of Transportation, Environmental Affairs Office. Olympia, WA. July 2001.*

GRANTS FUNDED:

Competitive Research Grants:

Advancing predictive understanding of hydrologic exchange in the river corridor. PI: A. S. Ward; Co-PI: S. M. Wondzell. 8/1/2018 to 7/31/2021. Funding: \$200,000 (\$188,040 to Indiana University; \$11,960 to USFS PNW) from US Department of Energy.

Collaborative Research: How do hydrology and biogeochemistry control carbon flux from headwater streams to the atmosphere? NSF – Hydrologic Sciences Program. PIs: R. Haggerty and S. M. Wondzell. Collaborators: D. Tonina and K. Feris. July 2014 – June 2017. \$444,943.

An assessment of the vulnerability of watersheds in Prince William Sound, Alaska to climate change. Proposal funded by the National Fish and Wildlife Foundation. Lead PI: G. H. Reeves; Co-PIs: S. M. Wondzell and N. Mantua. January 2013 – December 2015. \$300,000.

A decision support system for assessing the impact of fire management on threatened and endangered species. Proposal funded by the Joint Fire Sciences Program. Lead PI: G. H. Reeves; Co-PIs: L.E. Benda, W. Elliot, R. Flitcroft, P. Bisson, and S. Wondzell. May 2009 – September 2010. \$300,000.

Integrated Dynamic Landscape and Coho Salmon Model. Proposal funded by the Oregon Watershed Enhancement Board. Lead PI: P. Lawson. Co-PIs: D. Miller, K. Burnett, E. A. Steel, and S. M. Wondzell. 2007 – 2009. \$324,000.

Mapping current conditions and modeling the dynamic responses of riparian vegetation and salmon habitat in Oregon. Proposal funded by the Oregon Watershed Enhancement Board. Lead PI: S. M. Wondzell; Co-PIs: P. Bisson, K. Burnett, W. Cohen, M. Hemstrom, J. Kagan, J. Ohmann. Sept. 2007 – April 2010. \$640,000.

Collaborative Research: Hydrological linkages between landscapes and streams: transferring reach and plot scale understanding to the network and catchment scales. NSF – Hydrologic Sciences Program. PIs: B.L. McGlynn and M.N. Gooseff. Collaborators: J. Seibert, K.E. Bencala and S. M. Wondzell. April 2004 – March 2007. \$377,060.

Collaborative Research: Controls on hyporheic nitrate retention - discriminating among transport, reaction-rate, and substrate limitation. NSF Hydrologic Sciences Program. Co-PIs: R. D. Haggerty, S. M. Wondzell, and M. N. Gooseff. June 2004 - May 2007. \$450,000.

Evaluating the effects of prescribed fire and fuels treatments on water quality and aquatic habitat. Joint Fire Sciences Program October 2001-September 2004. Co-PIs: C. Clifton and S.M. Wondzell. \$299,151.

Interactions between streams and groundwater along the river continuum: Scaling up to a stream network. NSF - Hydrologic Sciences Program. PI: Wondzell. Co-PI: F. J. Swanson. February 2000 - January 2003, \$300,000.

Influence of natural processes and human modifications of river channels on stream-ground water interactions in the hyporheic zone of mountain streams. NSF - Japan Program (Joint project with Japanese Society for Promotion of Science). PI: Wondzell. Co-PI: F. J. Swanson. June 1998 - June 2001, \$23,000. (also with F. Nakamura and H. Shibata)

Interactions between streams and ground water along the river continuum: Influence of stream size, geomorphology, and catchment wetness. NSF - Hydrologic Sciences Program. PI: Wondzell. Co-PI: F. J. Swanson. November 1995 - November 1998, \$183,500.

Influence of human modifications of river channels on ground-water processes and surface-water quality. NSF-NATO Postdoctoral Fellowship in Science and Engineering. PI: Wondzell. March 1994 - March 1995, \$42,800. (To work at the Centre d'Écologie des Systèmes Fluviaux, Toulouse France).

The role of riparian forests in regulating nitrogen flux between ground water and surface water in third order stream valleys of Oregon. 1990 - 1992, \$16,410. Doctoral Dissertation Improvement Award, National Science Foundation.

Non-Competitive Grants and Contracts:

Predicting flow permanence and late summer low flows in western Oregon. Co-PIs: S. L. Johnson and S. M. Wondzell. 8/19/2018 to 1/1/2022. Funding: \$500,000. Interagency Agreement from the Bureau of Land Management to the Pacific Northwest Research Station.

Climate Regime Shifts and Extreme Events: Impacts on Tree Establishment, Growth, and Mortality in Southwestern Piñon-Juniper Savannas. Co-PIs: S. M. Wondzell and E. H. Muldavin. 7/1/2018 to 6/30/2020. Funding: \$29,997 from Western Wildland Environmental Threat Assessment Center.

Mechanisms of Impacts and Trends over Time: Exploring Potential Climate Change Influences on Stream Water Temperature. Funded through the USGS-USFS Joint Climate Change Research Project on Pacific Northwestern Freshwater Ecosystems. Co-PIs (alphabetic): P. Conolly, J. Dunham, S. Johnson, S. Wondzell. July 2010 – April 2012. \$500,000.

Knotweed Control Efficacy and Riparian Restoration. Lead PI: S. M. Claeson. Co-PIs: P. A. Bission and S. M. Wondzell US Fish and Wildlife Service, Chehalis Fisheries Restoration Program, FY2009. \$20,915.

Monitoring Long-Term Vegetation Dynamics In Big Bend National Park: Factors Controlling Woody And Grass Species Demographics With Implications For Restoration And Management. Proposal funded by the National Park Service, Chihuahuan Desert Network. Lead PI: E. Muldavin; Co-PIs: S. M. Wondzell & J. A. Ludwig. July 2007 – Dec. 2008. \$69,928.

The hyporheic zone: It's role in forest-stream interactions. USDA Pacific Northwest Experiment Station. PI: Wondzell. May 1999 - May 2000. \$15,078.

Influence of groundwater inputs and hyporheic exchange flow on low-baseflow discharge. HJA - LTER program. Co-PIs: Wondzell, S. M. and S. L. Johnson. June 1999 - Dec 1999, \$10,674.

Forty years of vegetation change in the desert grasslands of Big Bend National Park. PI: E. Muldavin. Co-PIs: S. M. Wondzell and J. A. Ludwig. 1995-96, \$5,500. National Park Service.
